

Website Committee Status Report

Web Development & Maintenance

CHARTER: Create, modify, and maintain the Club's website. They will make recommendations to the Board as to changes to the current website and direction for a new improved web site.

STATUS:

DATE: 1/10/2026

Meeting minutes: Larry Corder and John O'Brien discussed a possible path forward and have had several email exchanges about this. John has agreed to maintain the current site because he has knowledge in the structure and coding of the site. While this activity is on-going, we are also investing some time trying to understand all the various processes and inter-connectivity between them that govern the management of the shop. We are doing this so we can draft some requirements for a system that will enhance the manner in which the shop manages itself, it's documents, it's members, and it's website. We have started to look at possible suites of tools that may make this possible.

Mitchell Schaff has joined our committee and is currently investigating a more efficient and secure method of logging into our member area.

Next Meeting scheduled for Jan 26.

DATE: XX/XX/XXXX

Meeting minutes: Who attended, what was discussed, action items, next meeting date
